

Find natural balance in *blue*.

Gentle but naturally powerful, Hydrofera Blue CLASSIC antibacterial dressings are powered by a proprietary polyvinyl alcohol (PVA) foam and two organic pigments that create a multifaceted, non-cytotoxic environment for optimal wound healing. Hydrofera Blue's unique capillary action continuously pulls harmful bacteria-laden slough, exudate, and debris away from the wound bed.¹⁻³ This same action helps draw the body's natural healing agents to the wound, resulting in a balanced healing environment. Safe, effective, and versatile, Hydrofera Blue provides a natural balance for wound healing from start to finish.
